

Trauma Informed Care and Court – Improving Outcomes and Experiences

Trauma has an impact like ripples in a pond. Understanding the impact of trauma can benefit not only the people to whom we provide services but ourselves as well. Come learn about current research and practice that can transform your work and improve feedback and outcomes. Gain knowledge about the core principles of Trauma Informed Care and develop practical tools to apply to your day to day work.

This is a follow up to last year's Trauma Training provided by Abbey Stamp, but it's not necessary to have attended the previous training. This training will address specific scenarios and ways to better work with a trauma impacted public, with the end goal of making your jobs easier.
